Simple Book Store

Mahadev Nadimpalli

Project Description:

This website enables online browsing and ordering of books by the customers after they log in. It also provides online inventory & order management by the bookstore staff.

User Types and the functionality provided for them:

This website creates interfaces for three user types – the manager, the staff and the customers.

The manager can

1. login/logout
2. add/edit/delete inventory, staff and customers

The staff can

1. login/logout
2. view customer orders, process and change the order status

The customer can

1. register and then login/logout
2. browse the menu and order books

Information to store in the database

See the ER Diagram below.
